New Style of IT Challenge - Results

“ In the New Style of IT Challenge, we received great responses from you with over 50 interesting ideas submitted. I want to thank you for your participation that makes this event a success. The shortlisted ideas were further developed and showcased in the recently concluded DS Malaysia TechDay on Sept 18 and they all received all round positive feedbacks from the visitors. During the same time, the HP BIT was voted as the most liked idea as well.

Right now, I would like to take this opportunity to announce and congratulate the finalists and winners of the New Style of IT Challenge. - (Elmen, Tan) ”
